#### KALYANI MAHAVIDYALAYA

#### 1<sup>st</sup> Year Test Examination 2014 Microbiology Honours Paper I

Time:	4 hrs	F.M: 75				
(Use separate sheet for each group)						
	Group: A					
I. Ans	I. Answer the following questions briefly. (Any six) (1X6)					
a.	What is fungi imperfecti?					
	What is ribozyme?					
	What are coacervates?					
	What is methanogenesis?					
	Name one filamentous prokaryote.					
	What is the definitive host for <i>Plasmodium</i> ?					
	Differenciate between virus and virion.					
_	Name one halophilic bacterium.					
II. Ans	swer the following questions in short. (Any ten)	(2X10)				
a.	Write characteristics of Ascomycetes.					
	Write about the specialty of cell wall of archaea.					
	Write a short note on Koch's postulates.					
d.	Write a short note on Giardia.					
e.	Why is the primitive earth condition termed as anoxic reductive atmosph	iere?				
f.	Write about the economic significance of diatoms.					
g.	Name one scientist who has contribution in environmental microbiole with his contribution.	ogy along				
h.	What is the theory of endosymbiogenesis?					
i.	Write a short note on prion along with name of a disease caused by it.					
j.	Write a short note on RNA world.					
k.	Write about the structure of TMV.					
1.	Write about the replication '-'ve stranded RNA virus.					
III. Ar	aswer the following questions. (Any four)	(6X4)				
a.	Differentiate between lytic and lysogenic life cycle of virus.	3+3				
b.	What are the salient features of Bacillariophyta?	6				
c.	Write a short note on chemical evolution. Describe Oparin hypothesis.	2+4				
d.	Write about the contributions of Alexander Fleming and Louis Pasteur.	3+3				
e.	Differentiate between Archaea and Eubacteria. How many types of archaea are generally found?	halophilic 4+2				

# Group: B

I. Answer the following questions briefly. (Any five)		(1X5)
a. b. c. d.	What is plasmid? Name one endospore producing bacterium. What is the function of magnetosomes? What is transpeptidation reaction? What is pilin protein?	
f.	What is the function of carboxysomes?	
II. Answer the following questions. (Any four)		(2X4)
<ul><li>a.</li><li>b.</li><li>c.</li><li>d.</li><li>e.</li></ul>	Differentiate between capsule and slime layer. Write a short note on functions of cytoplasmic membrane. How spores help bacteria to survive adverse conditions? Differentiate between endospore and exospore. Give a diagrammatic representation of structure of flagella.	
III. Aı	nswer the following questions. (Any two)	(6X2)
a. b.	Write a note on different storage granules found in bacteria.  Differentiate between Gram +ve and Gram –ve bacterial cell wall.  Write briefly about eukaryotic mitochondria and plastid	6 6 3+3

### 1<sup>st</sup> Year Test Examination 2014 Microbiology Honours Paper II

Time:	4 hrs	F.M: 75
	(Use separate sheet for each group)	
	Group: A	
I. Ans	wer the following questions briefly. (Any six)	(1X6)
c. d.	What are hopanoids? Name one basic and one acidic amino acid. What is enantiomer? How many essential amino acids are there? What is the general structural formula of carbohydrate? Name the purine bases found in DNA. What is denaturation of DNA?	
II. An	swer the following questions. (Any eight)	(2X8)
c. d. e. f. g.	How nitrogen acts as a micronutrient?	
III. Aı	nswer the following questions. (Any three)	(6X3)
a.	Differentiate between competitive, uncompetitive and noncompetitive inhibition.	6
b.	RNA? What is hypertonic effect of DNA?	2+2+2
c.	Why amino acids are called ampholytes? Describe Xantho-proteic sodium aminoacetate is formed from glycine?	1+3+2
d.	Describe lock and key model of enzyme action. What is feedback i Name one allosteric enzyme.	10.00 nhibition? 3+2+1

## Group: B

I. Answer the following questions briefly. (Any five)		
	What is sedimentation coefficient? What do you mean by equally likely events in probability? What is half-life of a radioactive material? What is numerical aperture of a lens? What colour does proline develop on reaction with ninhydrin. Define range. What is null hypothesis?	
II. Ans	swer the following questions in brief. (Any six)	(2X6)
c. d. e. f. g.	State Lambert-Beer's law. Write the principle of affinity chromatography. How anionic exchanger works? Define standard deviation. Name two tracer elements along with their roles. What is the relation between $T_{1/2}$ and $\lambda$ ? What is dark field microscopy? What is SDS-PAGE?	
III. An	nswer the following questions. (Any three)	(6X3)
	Describe the process of paper chromatography with diagram. Calculate mean and standard deviation of the following data.	6
	3,6,7,3,11,12,23,25,10,18,25 and 30 Differentiate between SEM and TEM. Write the principle of phase microscopy.	3+3 contrast 4+2
d.	Define median and mode for simple series as well as grouped series alo the formula.	ong with 3+3
