## Report of THALASSEMIA Programme

Thalassemia is a group of inherited blood disorders that can be passed from parents to their children and affect the amount and type of hemoglobin the body produces. like previous year The NSS Unit of our college organized "AWARENESS PROGRAMME ON THALASSEMIA" and conducted a "THALASSEMIA CHECK UP CAMP" on 21.12.2017 in college campus. Extensive campaigning of the seminar and camp are done so that more and more students participate in the programme. Camp was started around 10.00 A.M. and was continued until the 2.00 P.M. All the students as well as staffs gave an overwhelming response for Thalassemia Testing. Medical officer Dr. N Halder, one Medical Technologist, 7 Medical assistants, conducted the screening test. 210 students, 37 staffs participated in the programme. Each participant collected their report from college after 7 days. It was pleasure to work for such an activity to all of us on that day and the Camp was successfully accomplished with everyone's support.
